Our Key Business Challenges Are Social Contribution and Reducing the Environmental Burden

The Hitachi Group has positioned the Social Innovation Business as our core business emphasis, and we work as a group to expand that business globally. There are several reasons why we call what we do Social Innovation Business.

Resolving Social Issues
First, continuing to simply supply the equipment and systems needed for the social infrastructure would not be enough to overcome the trials faced by society. Carefully honing and perfecting the functionality and performance of individual products and systems is of course an extremely important responsibility for a manufacturer. However, the issues facing many countries and regions around the world are becoming too complex to be resolved with equipment and systems alone. Take energy issues, for example. In many regions, economic development has brought power shortages. One solution is to build large, high-efficiency thermal power stations, but at the same time, because thermal power stations emit gases that cause environmental problems, we also need to look closely at these problems and strive to minimize the environmental burden so that we can be in harmony with the environment. If the environmental burden goes beyond tolerable limits, it will be necessary to use renewable energy such as solar and wind power. However, renewable energy relies on the weather, and the power that is produced fluctuates enormously. Robust management must be used to deal with the impact on power transmission and distribution systems for a stable, reliable supply of power. Many of these complex issues will not be easily resolved by the Hitachi Group alone, but the basic approach of our Social Innovation Business is to deepen our understanding of the particular issues to the greatest extent possible and to seek solutions together with our customers and partners. Engaging in close dialogue with people around the world, we will use Hitachi technologies to the full to help resolve social issues.

Using Innovation to Build a Sustainable Society
The second challenge is innovation. To deal with the complex issues facing society, we need to clarify these issues to the maximum extent possible—not an easy task. Many social issues by their nature have political, economic, and historical dimensions. We are developing certain technologies, including big data and data analytics, to gather a wide range of social phenomena from many perspectives into databases and to analyze that data. To bring about social and business innovations, we need to overcome many hurdles as we mobilize these technologies and apply methods for the experiential and objective analysis of social behavior. We believe that by taking on these challenges as a group, we can earn the trust of many people worldwide through our commerce, and that this will in turn grow our business. The Hitachi Group is committed to contributing to society through Social Innovation Business. In other words, we view our Social Innovation Business as the business of creating a sustainable society.

This sustainability report presents the many activities that the Hitachi Group carried out with a view to creating a sustainable society. As you will see, we operate around the world in a huge range of capacities. This report also lays out Hitachi’s management strategies and CSR, a diverse array of solutions showing how Hitachi contributes to society through business, respects human rights, promotes diversity, and helps to reduce the environmental burden from production, as we become a corporate citizen through our activities around the world.

As we have done in the past, in the years ahead we will position our business operations with a firm emphasis on the creation of a sustainable society.

Hiroaki Nakanishi

Editorial Policy
The Hitachi Group Sustainability Report 2013 presents the basic policies, promotion systems, measures, and key performance indicators for each initiative in keeping with reporting guidelines. This approach maintains an honest and transparent disclosure of information for fiscal 2012 initiatives and Hitachi’s approach to addressing the social and environmental issues that are vital to the sustainability of corporate management and society.

Scope of Reporting
[Period] The main period covered is fiscal 2012 (April 1, 2012 to March 31, 2013)
[Companies] Hitachi, Ltd. and 963 consolidated subsidiaries (including modified entities to which the equity method of consolidated reporting applies): total 964 companies
[Scope of data] Financial data: Hitachi, Ltd. and 963 consolidated subsidiaries (including modified entities to which the equity method of consolidated reporting applies): total 964 companies and 215 affiliated companies that use the equity method Social data: Scope of data indicated under each item

Disclosure of Financial and Non-Financial Information
Hitachi Ltd. presents information to match the needs of stakeholders reading this report. While financial information is in the Annual Report, the Hitachi Group Sustainability Report presents non-financial information. The Hitachi Group Sustainability Report 2013 presents comprehensive non-financial information as a PDF file (A4, 194 pages). Key issues are covered in the Hitachi Group Sustainability Report 2013 Digest, a 12-page A4 booklet. Our website also provides up-to-date Hitachi Group information.

External Evaluations
We were selected in September 2012 for the Dow Jones Sustainability World Indexes (DJSI) World, one of the world’s leading sustainability investment fund indexes.

Initiatives That We Participate in
We have been a member of the World Business Council for Sustainable Development (WBCSD) since 1995.
We have been a member of the United Nations Global Compact since February 2009.

Management Strategies and CSR

As a global enterprise, we share society’s values and pursue sustainable growth by integrating management strategies and CSR. Our challenge is to match our CSR activities with our Mid-Term Management Plan goals to achieve the Hitachi Group Vision, creating both social and economic value.

For us, CSR is about making our Group Vision a reality. Our purpose is to contribute through innovation to both realizing a safe, secure, comfortable society and helping to tackle global challenges: poverty, inequality in education, the spread of diseases, resource and energy issues, population concentration in cities, and other global environmental issues.

The Mid-Term Management Plan is our action plan for realizing the Group Vision. Our CSR activities help to achieve the goals set out in this plan. By implementing the plan, we are creating robust, diverse governance, as well as strong ethical behavior from and a sense of challenge for our employees. Additional benefits include promoting business that helps to resolve environmental problems and other issues facing society as a good corporate citizen in global society. While implementing the Mid-Term Management Plan, Group employees comply with national laws and, wherever they are in the world, they work with a strong sense of ethics in line with the Hitachi Group Codes of Conduct.

Trends in Society and Hitachi Group Identity

In April 2013, as we began on a new Mid-Term Management Plan, we created the Hitachi Group Vision to show what the Hitachi Group intends to become. The Vision draws on the ethics and values that the Group has developed over the past 100 years—encapsulated in our Corporate Credo and Founding Spirit—to lay out a new medium- to long-term vision for the Hitachi Group. Recognizing the changing macro trends in society, the Vision embodies our firm commitment to help resolve the challenges facing the global community and to realize a sustainable society. Together with creating our Vision, we have also merged the Corporate Credo, Founding Spirit, and Hitachi Group Vision into the Hitachi Group Identity.
2015 Mid-Term Management Plan to Realize the Hitachi Group Vision

Our action plan for realizing the Hitachi Group Vision is the 2015 Mid-Term Management Plan.

Management Targets
To achieve our management targets, we will grow and transform through our Social Innovation Business.

Management Focus
In the 2015 Mid-Term Management Plan, our key management policies focus on innovation, a global emphasis, and transformation.

Summary of Key Management Policies
I. Global Expansion of the Social Innovation Business
In our Social Innovation Business, we work as One Hitachi with society and our customers to identify their issues, creating innovation through Group teamwork. We provide global solutions combining products, services, and IT (cloud) platforms.

II. Promoting Transformation
Bold structural reforms will fulfill the 2015 Mid-Term Management Plan. Our supply chain management will be rebuilt to quickly respond to markets and boost management efficiency, leverage business intelligence to speed up our response to environmental changes, improve our balance sheets, and upgrade our operations globally.

We will better utilize our human capital—our most critical resource—using a global strategy. Our global grading system and human capital database help to optimize personnel deployment worldwide. Our human capital development promotes diversity at all levels, including management, to maximize organizational and individual performance. Human capital is the foundation of our growth strategy.

Other steps include creating a market-driven organization, speedily transforming our business portfolio, and reviewing our cost structure.

Material Issues for Hitachi

Hitachi uses a materiality process based on dialogue with stakeholders to identify material issues. To integrate our management strategies and CSR, we reflect in our CSR activities material issues closely related to the key management policies in our Mid-Term Management Plan. The content of this report also reflects Hitachi’s material issues supporting the improvement of the quality of our management.

Selection Process for Material Issues

We evaluate and verify issues identified through stakeholder dialogues with international organizations, and we identify sustainability issues in public policy trends from the standpoints of importance for stakeholders and the influence on business. The importance for stakeholders includes human rights, international development, the environment, reporting, ethics, and regional and international requirements. The influences on business are assessed from the perspectives of the global, fusion, and environmental focuses of our 2012 Mid-Term Management Plan, as well as the perspectives of innovation, risk, reputation, and cost effectiveness. This digest report presents these important issues in the two assessment areas.
Performance Overview of 2012 Mid-Term Management Plan

We have revised our business portfolio to reflect the shift in focus to Social Innovation Business. While we did not reach our overall revenue target, we did achieve most of our profit targets. We also realized our D/E ratio and equity ratio targets, enabling us to strengthen our foundation for further growth.

Contributing to Society through Business

Creating value to fulfill our Corporate Credo is the basis of the development of our Social Innovation Business which helps resolve environmental issues such as: energy, water, resource and food shortages, urban population growth, and the graying of societies.

Hitachi’s Solutions for Social Problems

Health and Aging Issues

Responding to aging in societies worldwide, our medical solutions maintain and improve health. As well as diagnostic and testing equipment for early treatment, we supply pharmaceutical manufacturing equipment for safe, effective drugs.

Healthcare

Our R&D promotes medical innovation in such areas as ultrasound diagnostic equipment, MRI scanners for highly advanced medical care, and particle therapy equipment.

Environment and Energy Issues

The aim of our environmental management is to “achieve a sustainable society.” For one key element of this aim, preventing global warming, we are reducing CO₂ emissions through our business operations.

Energy-Saving Products and Systems

We are helping to reduce CO₂ emissions across society as a whole by providing products and services with low energy consumption.

Power Generation Systems

We use wind and solar power and other renewable energies. Also, we reduce CO₂ emissions by improving the efficiency of power generation systems.
Biodiversity, Water and Resource Issues

Ensuring biodiversity for the next generation means preserving ecosystems today. We help to protect ecosystems through business operations that clean the air, water, and soil.

**Water Environment Solutions**

Our various water environment solutions—purifying polluted water and desalinating seawater, for example—enable more efficient use of this limited resource.

**[Case Study]**

**The Maldives: Water and Sewage Projects**

We participate in water and sewage projects that support a stable supply, including building a pipe information management system in the island of Malé, a part of the nation’s capital. We are also proposing the multi-stage use of deep sea water for air conditioning in the airport building as well as potable water from a seawater desalination unit.

**Cities and Transportation Issues**

Our infrastructure solutions boost safety and comfort in cities and remote islands with limited infrastructures. Solutions include safe, high-speed transportation networks; highly stable, efficient power source equipment and transmission networks for diverse power sources, including renewable energy; and water systems for safe, constant water.

**Smart Cities**

Worldwide, we propose new forms of cities that are safer, more secure, and more convenient and contribute to the standardization of smart city infrastructures.

**Building Security**

Our building security systems cover exit/entry as well as elevator operations and maintenance.

**Transportation Systems**

Our safe, convenient railway and traffic information systems help reduce the environmental burden and congestion.

**[Case Study]**

**Maui Smart Grid Demonstration Project**

This project aims to build a smart grid environment, while deepening mutual understanding with the local community through a dialogue process. Electric vehicle (EV) charging systems, ICT platforms, home gateways, and other technologies will be introduced to support EVs, make maximum use of renewable energies, and ensure a constant power supply.
The aim of our environmental management is “achieving a sustainable society.” As the world’s population increases to 9.6 billion by 2050, economic and social activities seriously affect environmental problems. We are committed to global warming prevention, resource conservation, and ecosystems preservation as the three pillars of our vision, and our goal is to achieve a more sustainable society by promoting global production that reduces the environmental burden of a product throughout its life cycle.

The Hitachi Environmental Vision

Reduce CO2 emissions in energy production
Enhance energy efficiency of our products
Prevention of Global Warming
Conservation of Resources
Preservation of Ecosystems
Collect products for reuse or recycling
Reduce negative effects on air, water and soil

Towards a Sustainable Society

The Environmental Vision 2025 targets global warming prevention, and states our goal of helping reduce annual CO2 emissions by 100 million tonnes by 2025 through Hitachi products and services. This means that as we reduce CO2 emissions by improving products efficiency, our contribution to curbing CO2 emissions through the use of our products and services will be 100 million tonnes per year by 2025 compared with 2005.

In fiscal 2012, a wide range of products and services including high-efficiency thermal power plants, energy-saving information systems and air conditioners contributed to the reduction in emissions by 22.74 million tonnes. We develop and popularize products that cut CO2 emissions, helping to prevent global warming.

Contributions to CO2 Emission Reduction (Base: FY 2005)

(millions of CO2 Emission reduction)

- Power sector 70%
- Industrial sector 20%
- Transportation, commercial, and residential sectors 10%

2011: 19.04
2012 (estimate): 22.74
2015: 35.00
2020: 63.00
2025 (FY): 100 million tonnes/year

† The 2010 figures in the IEA’s CO2 Emissions from Fuel Combustion Highlights (2012 Edition) are used for CO2 emission coefficients.

Main Products Contributing to CO2 Emission Reductions in Fiscal 2012

High-Efficiency Gas Turbine Generators
Power Systems Company, Hitachi, Ltd.

Kansai Electric Himeji No. 1 Thermal Power Station
Two gas turbine generators began operating in August 2012 at Kansai Electric’s Himeji No. 1 Thermal Power Station. Using high-efficiency H-25 gas turbines, the plant was built in just four months, in time for summer power demand. The new plant’s annual contribution to CO2 reduction is 37,000 tonnes.

Multi-Split Air Conditioning System
Hitachi Appliances, Inc.

Multi-Split Air Conditioning System for Buildings FLEXMULTI High Efficiency
FLEXMULTI air conditioning system integrates several indoor units with one outdoor unit. This advanced technology—high efficiency compressor at low speed and concentrated winding brushless DC motor and enhanced refrigeration cycle control—sharply reduces power consumption. For the 28.0 kW model, the annual contribution to CO2 reduction is 0.9 tonnes per system.

PC Server
Information & Telecommunication Systems Company, Hitachi, Ltd.

PC Server HA8000/RS220
The high-efficient power supply module and power capping function, which manages processor performance in order not to go beyond the configured limitation, control server power consumption. The annual contribution to CO2 reduction is 14.2 tonnes per server.

† Please see pp. 078–080 of the Hitachi Group Sustainability Report 2013 (PDF) on the method used for calculating the contribution of Hitachi products to CO2 emission reduction and other details.
Reducing Environmental Load in Business Activities

To promote the Environmental Vision 2025, we have set targets in the Environmental Action Plan for reducing greenhouse gas and chemical substance emissions, waste (including valuable resources), and water use. The Third Environmental Action Plan launched in fiscal 2011 was revised in fiscal 2013 to respond to changes in the external environment and to carry out the plan in line with the 2015 Mid-Term Management Plan for fiscal 2013 to 2015.

For details see the Hitachi Group Sustainability Report 2013 (PDF), pp. 067–070.

WEB Third Environmental Action Plan in Fiscal 2012: Achievements
WEB Third Environmental Action Plan for 2013 to 2015: Targets

We set a 7 percent target for reducing CO2 emissions per unit production in fiscal 2012. To reduce energy-related CO2 emissions, we installed high-efficiency equipment and devices, including LED lighting and inverter air conditioners.

FY 2005 (base year)

Downwind Wind Turbine Generating System
Power Systems Company, Hitachi, Ltd.

When used in mountainous or hilly regions, where updrafts are common, this downwind turbine system—the rotor is on the downwind side of the tower—can generate 2 to 8 percent more power than upwind models.

WEB Examples of Eco-Products Select*1

Examples of Eco-Products Select*1
Refrigerator R-C6700 and 13 other Vacuum-Compartment models Hitachi Appliances, Inc.

Due to energy-saving technologies (Frost Recycle Cooling, etc.), this series as a whole has an energy efficiency standard achievement rate of 256 percent or more (FY 2010 standard).

Refrigerator R-C6700

*1 Eco-Products that meet even more demanding requirements are designated as Eco-Products Select.
For details see the Hitachi Group Sustainability Report 2013 (PDF), pp. 071–077.
FY 2012 Governance and Social Report

We constantly work to improve our corporate governance so that we can continue to grow in global markets as a good corporate citizen. To integrate our management strategies with CSR, we have identified six material issues, including respect for human rights.

Corporate Governance

By enhancing corporate governance, we promote more efficient management. In fiscal 2012, seven outside directors were the majority of our thirteen-member Board of Directors. These seven outside directors included three non-Japanese and one woman.

Our Codes of Conduct deepen awareness and instill compliance practices. Bribery prevention and other measures maintain fair trade. We audit our compliance system and promptly address breaches, promoting robust, sustainable management and business practices. Our Senior Vice President, who is also an executive officer, was appointed Chief Compliance Officer.

Innovation Management

Innovation, with R&D at its core, is the driving force of sustainable global growth. Hitachi invested 341.3 billion yen in R&D in fiscal 2012, or 3.8 percent of sales: 70 percent on sponsored and advance sponsored research and 30 percent on basic and platform research.

Our R&D organization has seven bases: Japan, the United States, Europe, China, Singapore, India, and Brazil. To promote regional R&D (280 researchers are outside Japan), we established the European Rail Research Centre in the United Kingdom, the Hitachi China Materials Technology Innovation Center in China, and the Big Data Research Laboratory in the United States.

Seven R&D bases worldwide
R&D spending of 341.3 billion yen in FY 2012

Social Contribution Activities

The medium-term priorities of our 2012 Social Contribution Promotion Plan are education, the environment, and social welfare—in and outside Japan. To encourage volunteering among Group employees, more than 60 Group companies held Hitachi Volunteer Days in November and December 2012. In fiscal 2012, we funded 3.3 billion yen to support education, the environment, welfare, and disaster aid. Many business sites held local clean-ups. As a good corporate citizen, we will continue to help build a better society.

Held Hitachi Volunteer Days

Independent outside directors became majority
CCO appointed

WEB Corporate Governance Guidelines of Hitachi, Ltd.

WEB Hitachi Internal Control Assessment Framework
http://www.hitachi.com/csr/governance/gove/index.html#gove03

WEB Hitachi Group Codes of Conduct
http://www.hitachi.com/about/corporate/conduct/index.html
Respecting Human Rights

Cherishing humanity is fundamental to our management at Hitachi. In May 2013, we adopted the Hitachi Group Human Rights Policy, clarifying our understanding of human rights. At a minimum, those are the rights outlined in the International Bill of Human Rights and the International Labour Organization’s Declaration. Our responsibilities include due diligence*1 (using the UN Guiding Principles on Business and Human Rights), training, adhering to all nations’ laws and regulations, and respecting international human rights.

*1 Human rights due diligence: An on-going process to identify and assess potential and actual human rights impact, integrate findings, and take action to prevent or mitigate the potential impact or to provide for or cooperate with remediation of actual impact.

Hitachi Group Human Rights Policy created

Supply Chain Management

Our basic principles on procurement call for forging long-term partnerships, mutual understanding, and reliable relationships with all suppliers. For these reasons, we share guidelines and communicate with suppliers to promote CSR. We ask key suppliers to use CSR checklists. In fiscal 2012, we collected the results from 98 suppliers—57 in Japan and 41 outside Japan. Additionally, since July 2012, we have started auditing suppliers mainly in China and the rest of Asia. In fiscal 2012, we conducted CSR audits of 12 suppliers.

Conducted supplier CSR audits

Diversity Management

Through diversity management—placing the right people, regardless of gender, nationality, career, or age—we boost global competitiveness, building a responsive workforce.

To support female employees, we have set goals of appointing a female executive by fiscal 2015 and increasing female managers in Japan to 1,000 by fiscal 2020 (a 2.5 times increase). We enhance education for female senior managers. The ratio of females has grown steadily, reaching 16 percent in fiscal 2012, with 3.5 percent of managers being women.

From fiscal 2012, our Diversity for Next 100 initiative will promote diversity management as a key management strategy in Japan.

1,000 female managers by FY 2020 in Japan

Public Policy

Partnerships with government agencies, policymakers and industry representatives are vitally important for social infrastructure projects. At international conferences, we give guidance for policymaking improvements.

In fiscal 2012, we offered our views at the Mekong-Japan Industry and Government Dialogue and at the Japan-France Energy Forum. When the EC was creating sector guidance on business and human rights, we formulated the views of the Japan Business Council in Europe (JBCE). In the US, we provide information to influential think tanks and the American Association for the Advancement of Science for their policy proposals to government.

- Student: 6%
- Other: 8%

---

**Main Feedback and Our Response**

**Encouragement**
- The Message from Management was easier to understand than other companies’.
- The report was easy to read, without overly long sentences or an excessive number of figures and graphs.
  (The comprehensibility score rose from 37 percent for the 2011 report to 45 percent for 2012.)

**Suggestions**
- Couldn’t the digest be a bit more compact? (30 percent of respondents thought the digest was too long.)
- The digest could foster better customer satisfaction if it highlighted Hitachi’s unique approach in its business activities.

**Our Response**
- We reduced the number of pages from 24 in the 2012 digest to 16 in this 2013 version and focused on key points, making it easier to absorb at a glance.
- We explained in more detail the relationship between our management strategy and CSR and our contribution to society through business.
- Regarding technical and other specialist terms, we appended footnotes as much as possible.
