In April 2019, Hitachi announced its three-year 2021 Mid-term Management Plan, positioning IT, Energy, Industry, Mobility and Smart Life as growth sectors, assigning relevant business units to each of them. Hitachi is characterized by two strengths: The first is our ability to provide solutions that use digital technology to resolve issues facing customers and society through our cutting-edge IT and our operational technology (OT), which moves social infrastructure such as equipment and systems at production sites, railways and power plants. The second is our highly reliable and superior products. In these five sectors, Lumada will function as a platform that creates value from customers’ data and supports the rapid delivery of solutions.
