

Hitachi Announces Plans to Integrate GlobalLogic and Hitachi Digital Services to Accelerate Global Growth of Lumada 3.0

Santa Clara, January 28 and Tokyo, January 29, 2026, Hitachi, Ltd. (TSE:6501, "Hitachi") today announced that it intends to integrate two of its U.S. subsidiaries, GlobalLogic Inc. ("GlobalLogic") and Hitachi Digital Services LLC ("Hitachi Digital Services") to accelerate the global growth of Lumada 3.0, drive the digitalization of the entire Hitachi Group, and further strengthen the delivery structure of Hitachi's Digital Systems & Services sector. Lumada 3.0 is the company's strategic initiative to drive digital transformation by leveraging Hitachi's digital capabilities, domain knowledge cultivated in mission-critical fields, and extensive global installed base. By combining GlobalLogic and Hitachi Digital Services, Hitachi plans to create a robust digital business organization that offers end-to-end expertise across the digital transformation lifecycle — from strategy planning, design, and development to run operations — and possesses the capabilities to reliably integrate advanced digital technologies, including AI, within large-scale, mission-critical systems.

The operational integration of GlobalLogic and Hitachi Digital Services will be led by Srin Shankar, current President & CEO of GlobalLogic, and is expected to commence in April 2026.

This integration will accelerate market transformation and digital business growth by addressing the technology challenges facing Hitachi Group and its clients, including digital transformation, access to reliable mission-critical systems, and AI implementation.

The strengths of these organizations will be combined, including digital engineering, software development capabilities spanning from chip to cloud, AI application technologies, and mission-critical system integration. Leveraging these capabilities and the domain knowledge Hitachi Group has cultivated in its OT and product areas, the "Customer Zero" approach will drive internal digitalization.

Then, by incorporating these internal achievements, the new organization will contribute to solving complex client challenges in key verticals, including mobility (e.g. automotive and railways), energy, and industrial.

The integrated organization will also help Hitachi to establish a unified AI Factory underpinned by powerful offerings like [VelocityAI from GlobalLogic](#) and [HARC from Hitachi Digital Services](#) and a strong ecosystem of partners and alliances to enable the development and deployment of AI offerings grounded in real-world operations, and their seamless implementation and operation in mission-critical fields. Furthermore, by deepening collaboration within the Hitachi Group, the new organization will accelerate the deployment of the next wave of [HMAX by Hitachi solutions](#) that bring the power of advanced AI to the world – maximizing outcomes and value for both clients and society.

Through these initiatives, Hitachi will accelerate the growth of Lumada 3.0 and contribute to the realization of the harmonized society aimed for in [Hitachi’s Inspire 2027 management plan](#).

Key Points of the Strategic Integration

The planned integration of GlobalLogic and Hitachi Digital Services will address increasing client demands for:

- **End-to-End Capabilities and Global Delivery at Scale**
A proven strategic partner with deep domain knowledge and end-to-end accountability — from product strategy and design to run operations — backed by a global footprint and delivery system.
- **Accelerated Business Value Creation with AI**
Access to a unified AI Factory, differentiated AI-powered offerings, and a strong ecosystem of partners and alliances to accelerate the development of AI offerings grounded in real-world operation, the seamless implementation in mission-critical fields, and the realization of tangible business outcomes faster.

Comment from Jun Abe, Executive Vice President of Hitachi, Ltd., General Manager of the Digital Systems & Services Division

“In line with our Inspire 2027 management plan, the planned integration of GlobalLogic and Hitachi Digital Services, two complementary digital services businesses, and creation of a robust digital business structure is a pivotal step to advance our Social Innovation mission through the acceleration of Lumada 3.0 and to accelerate our next digital leap forward. With deep domain knowledge and powerful AI capabilities and offerings, collaboration with our clients and partners, and an eye on “what’s next,” our combined organization can expand beyond the existing market opportunities for each individual organization and, as important, support Hitachi’s goal to unlock the potential of people and society and co-create a sustainable future where everyone can thrive.”

Comment from Mike Krut, Senior Vice President, IT & CIO, Penske Transportation Solutions

“In working collaboratively with GlobalLogic and Hitachi Digital Services, Penske Transportation Solutions is seeing the meaningful value these organizations can deliver. Their intended integration is a very positive development for us - a single partner who understands our industry and our business. Their teams have been committed to enabling growth and ensuring our satisfaction, and success along with end-to-end accountability – from product strategy through run operations. Together, we build upon what is already working and expand into what is possible.”
